

Python

Programming intro

What is python?

Python logo

Characteristics

1

Easy to learn

Easy to read

Easy to maintain

Interpreted

scalable

who can use?

Software engineers

Data analysts

Mathematicians

Scientists

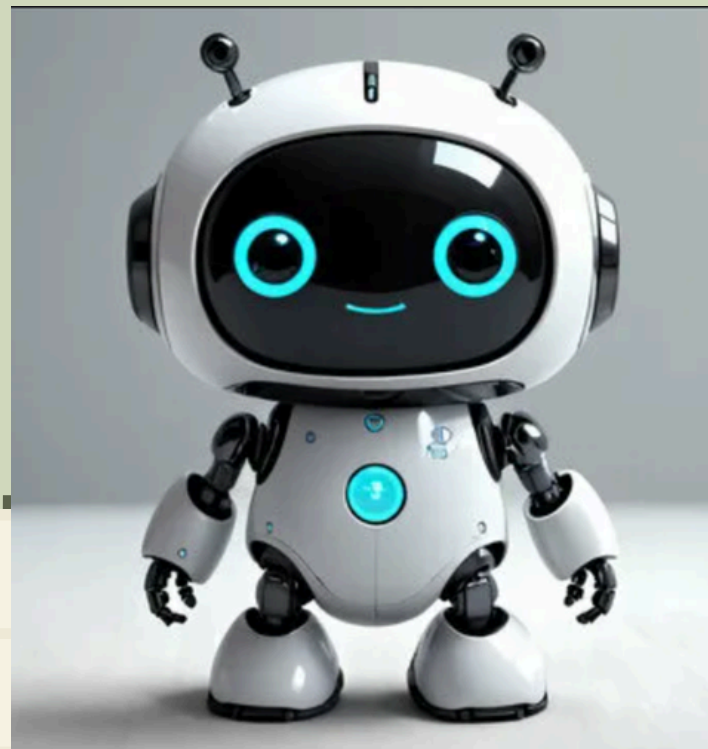

accountants

Where is it used?

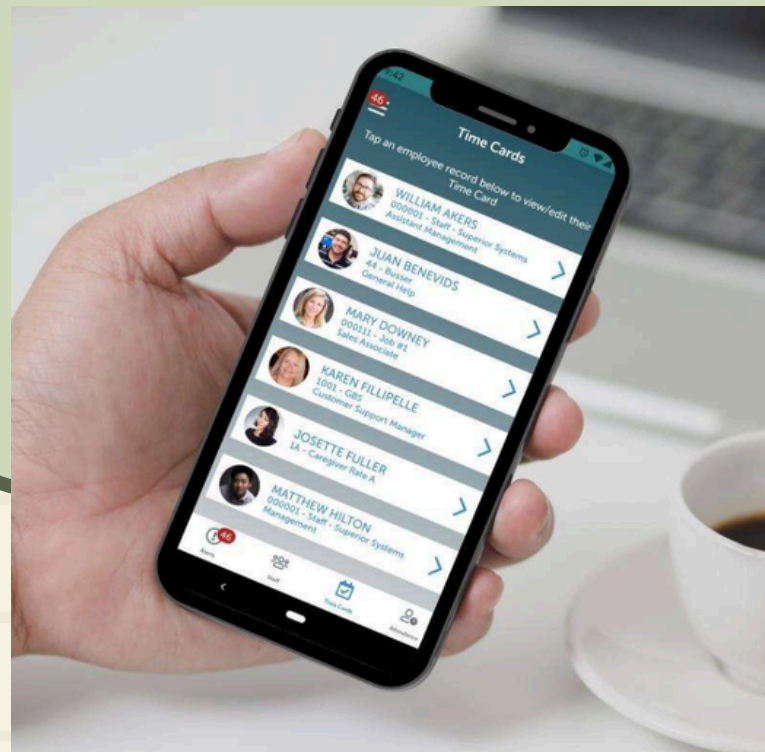

1

Artificial Intelligence

2

Mobile/desktop apps

3

Hacking

PROCESS

1

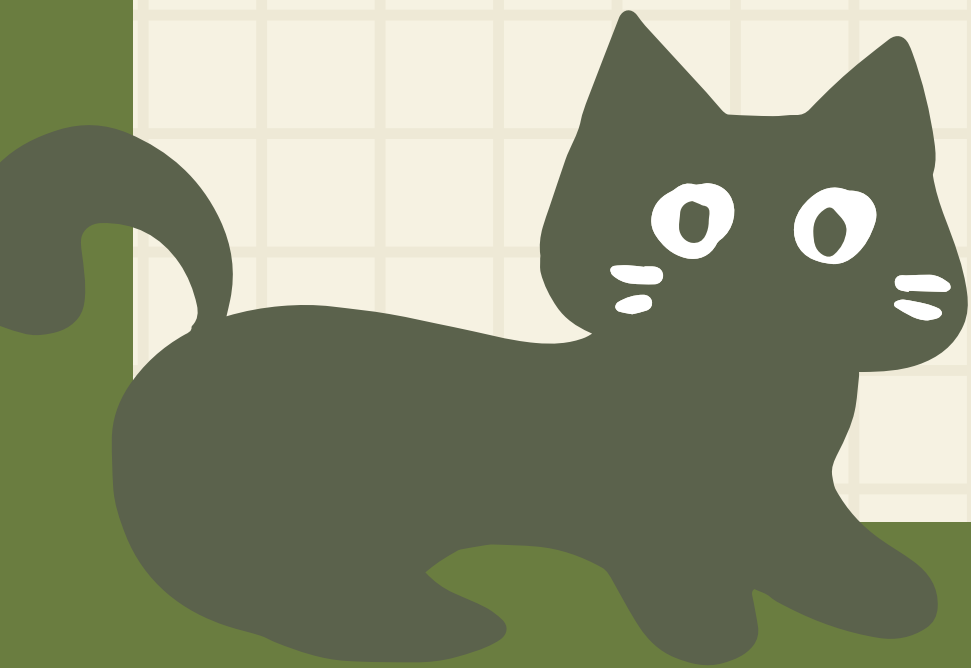

Watch and learn

2

Interact

3

Do it yourself

our programming webiste

Week 1

Learn how to make Python talk and listen to you.

Week 2

Write if else statements!

Week 3

Build a guessing game loop that runs until you win.

Week 4

Final project

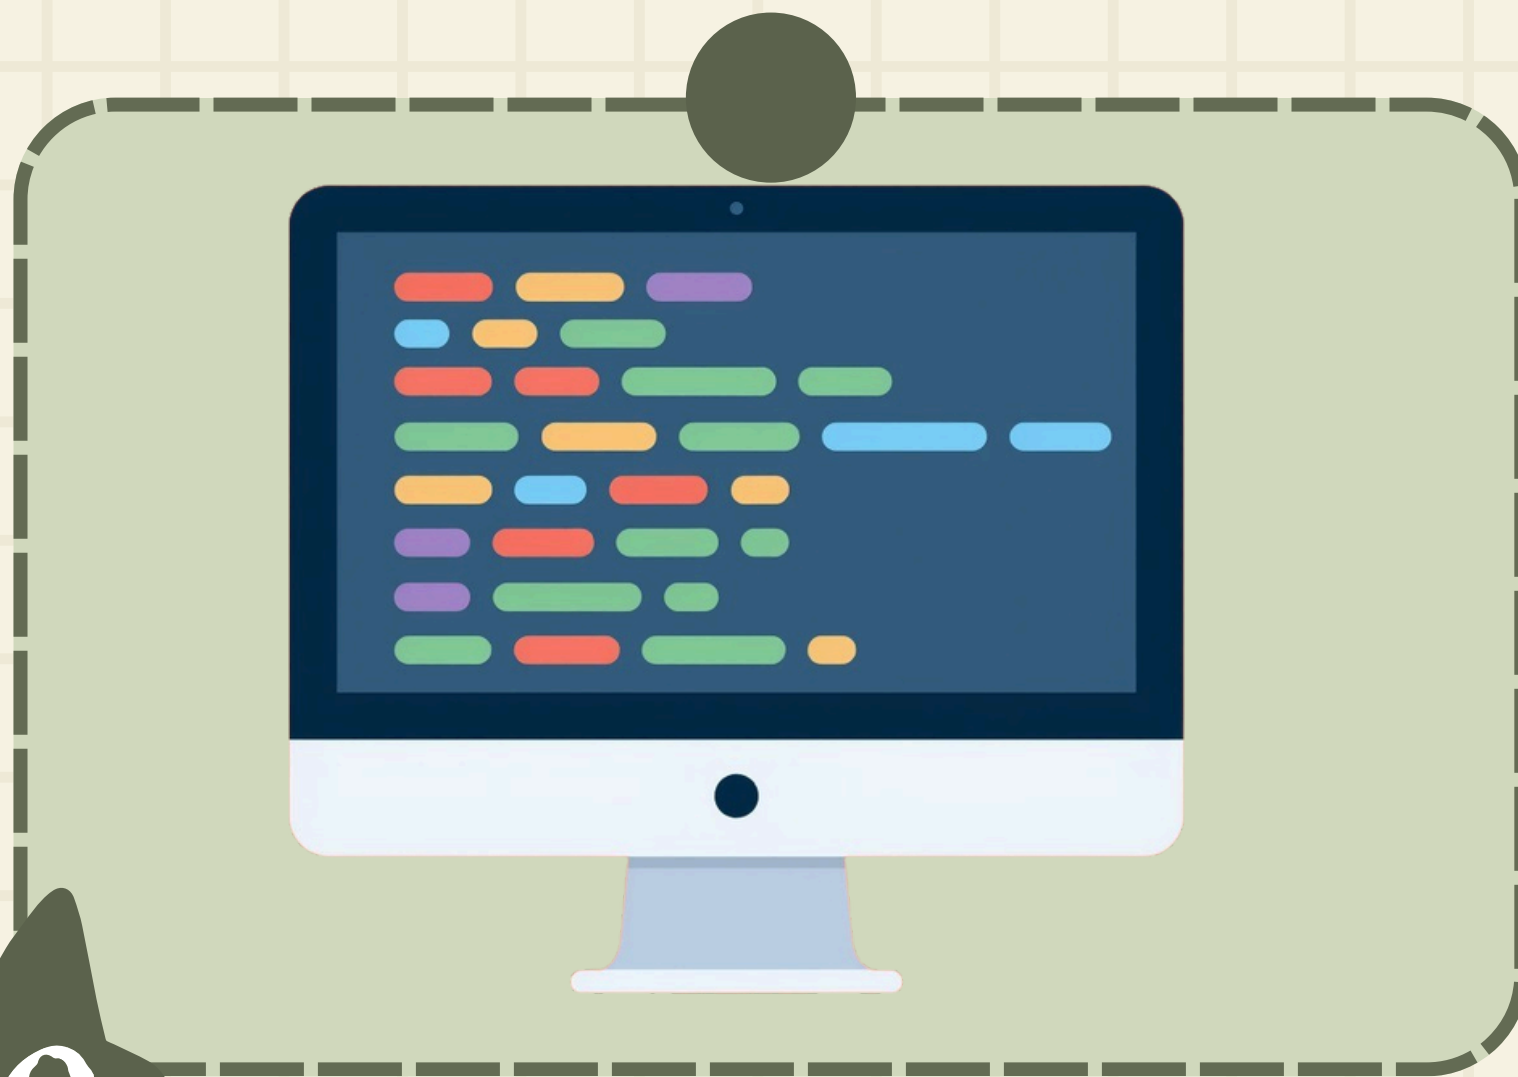

<https://playground.programiz.com/>

main.py

```
1 print("Try programiz.pro")
2 print(
```

What to do

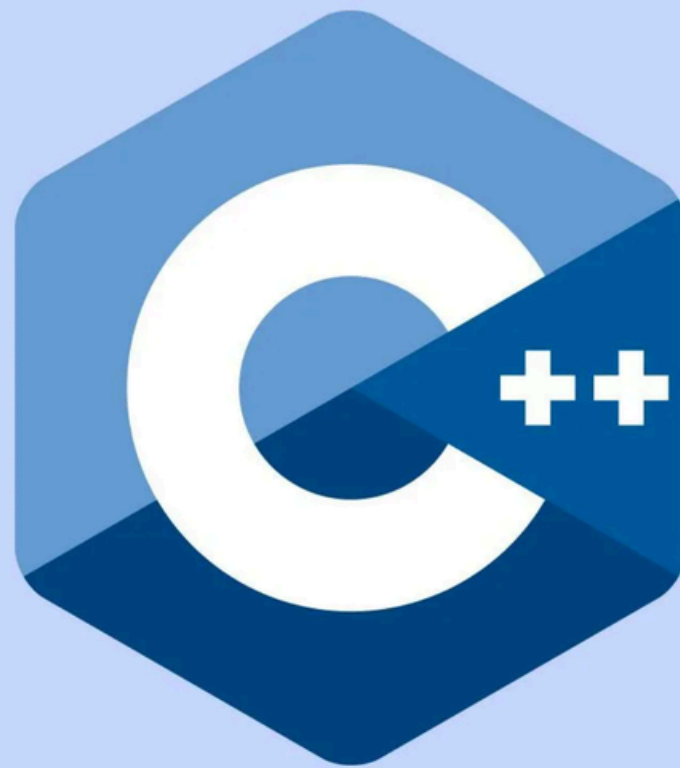

- **Rule 1: Have Fun!**
- **Rule 2: Embrace the Bugs!**
- **Rule 3: Spot the Mistakes!**
- **Rule 4: Try It Later!**

Types of programming languages

The logo for JavaScript, featuring the letters 'JS' in a bold, dark blue font on a yellow background.

Javascript

C++

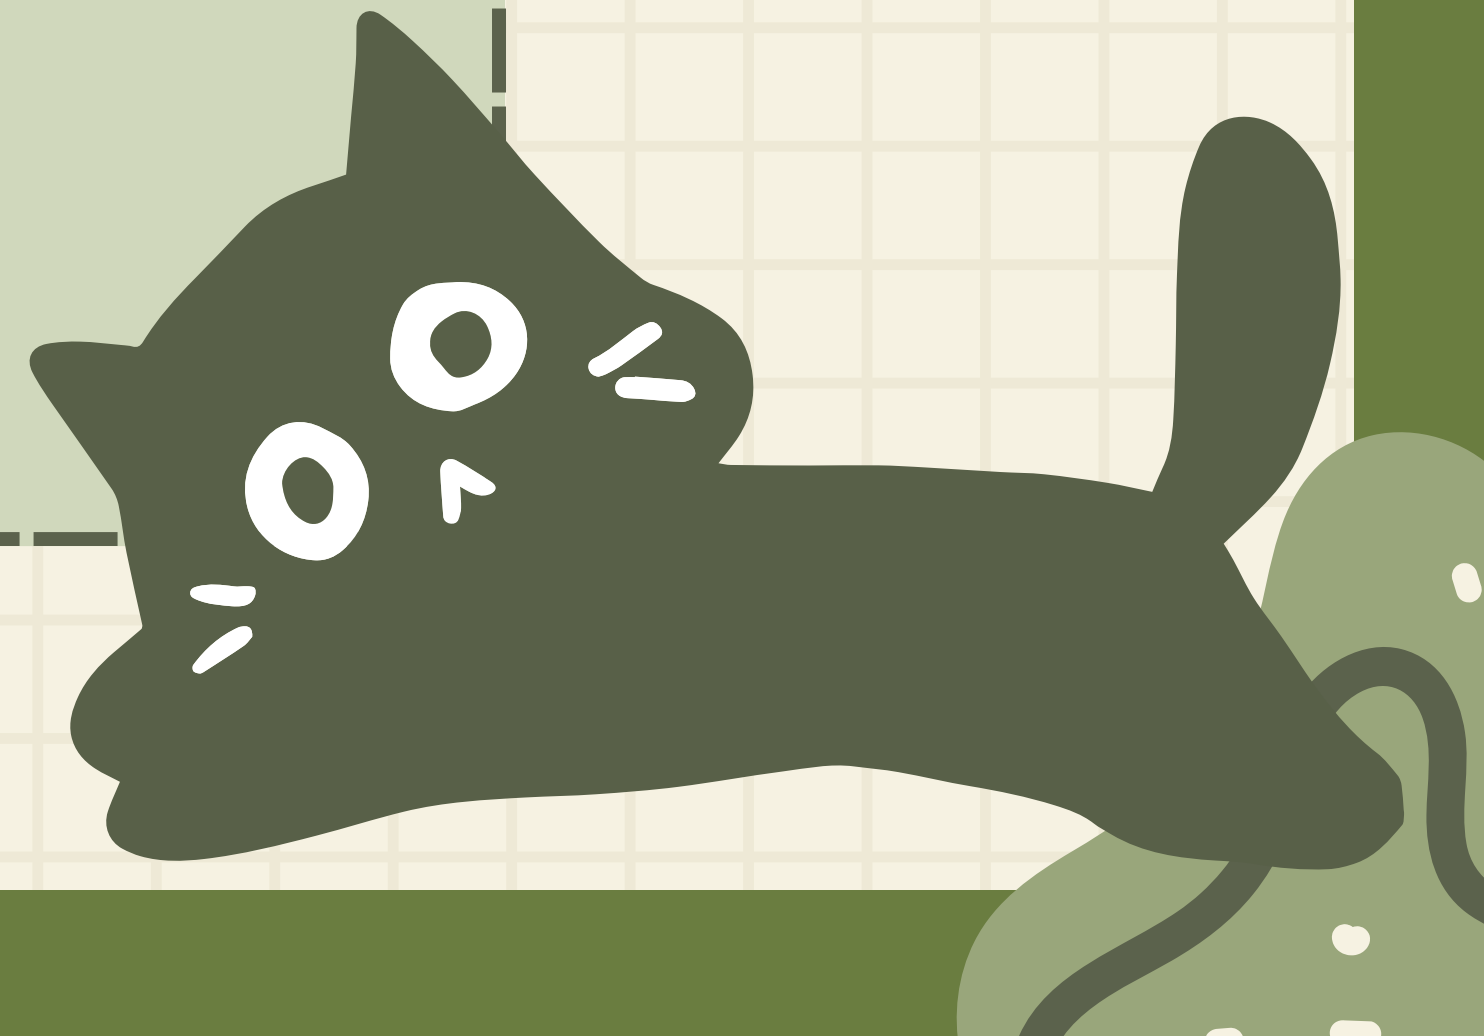

Lua

Today's topic:

Variables, Input and print
